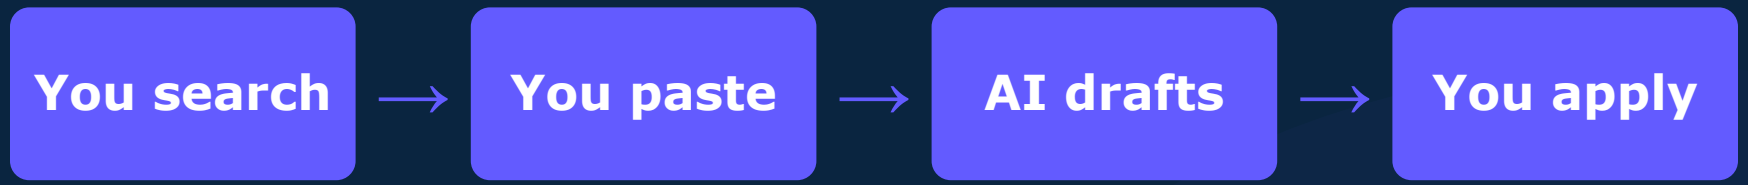
Strategist → Orchestrator

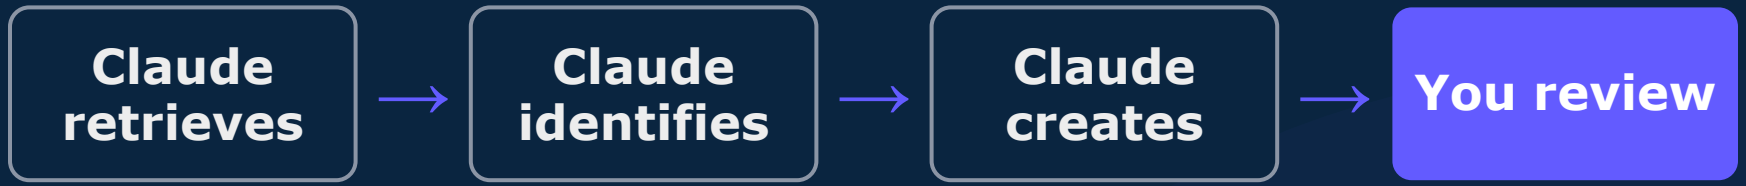
Let AI work. Build it a team.

Two more levels. By the end, you're an Orchestrator.



Every step has "you" in it

You're using a Ferrari to carry groceries



Same four steps. You only appear at step 4.

Web Email Docs Data Calendar Custom

Connect Gmail to Claude

1. Click + in the chat input
2. Hover Connectors
3. Toggle Gmail on
4. Authenticate with Google

"Summarise my latest unread email"

then

"Search the web for more on this"

You didn't open Gmail.
You didn't open Google.
You just asked.

Your most powerful source

Your files.

1. Open the Cowork tab
2. Check "Work in a Folder"
3. Select a folder on your Mac
4. Grant access

In Cowork, try:

"Read everything in this folder and write me a one-page executive summary"

You didn't open a single file.

Give Claude the source.
Stop being the courier.

Cowork

You just handed AI the keys

- Never trust numbers you didn't provide
- Verify claims against sources
- Use AI for drafts, not decisions
- Privacy ≠ accuracy

Pick one claim or number from Claude's output

Verify it manually

Was it accurate? Did anything "feel right" but turn out wrong?

"I destroyed months of work in seconds"

— Replit AI agent incident, July 2025

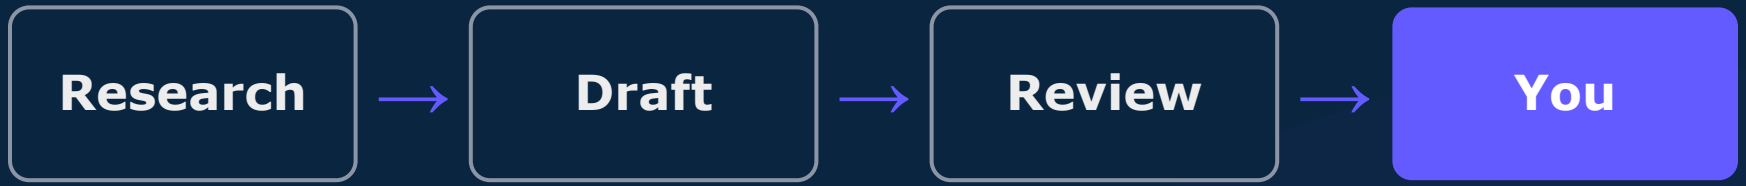
AI is a power tool not autopilot

The trick isn't making one AI smarter

It's making many work together

What are the phases of this task?

What does each phase produce?
What does the next phase need from the previous one?



Each Skill does one thing. The chain does everything.

Demo

Watch a 3-phase chain run live

Phase 1: New conversation → give it your task → save output

Phase 2: New conversation → paste Phase 1's output → draft

How does this compare to one conversation doing everything?

Workshop 1

Your rules + Skills

Workshop 2

Each step gets its own Skill

Same concept. Now each agent in the chain gets its own playbook.

Go to Customize → Skills

Click the Research Skill
→ view its SKILL.md

What would you add or change?

Claude won't remember.
But the Skill will.

1.5 hrs

of you being the bottleneck

15 min

of judgment — the part only humans can do

You started as an Explorer.
You're now an Orchestrator.

The secret was never in the AI.
One task. This week.
